## Rhino Conservation Team Project Response Rubric

Team # 3

1. **How well do these team information products fulfill the vision & goals of the team proposal?** Actually, much like team 2, you exceeded my expectations...I had a hard time visualizing this based on your proposal
2. **How effective are these products for you as a user & stakeholder?** This may be the most effective tool that I have seen presented to me so far. Flow charts are extremely helpful especially with old people like me.
3. **What improvements do you recommend?** I am not technologically advanced enough to make very many recommendations here but I really liked the way things were easily categorized. The video was very nice and visually appealing. Someone like myself

would have fun.... having enough time to play around with the flow chart and see what  
all I discovered clicking links

**Comments: Fabulous job....really like what you did here and think that this would be  
extremely beneficial.**

**Thank you**
